

# Step by step generate

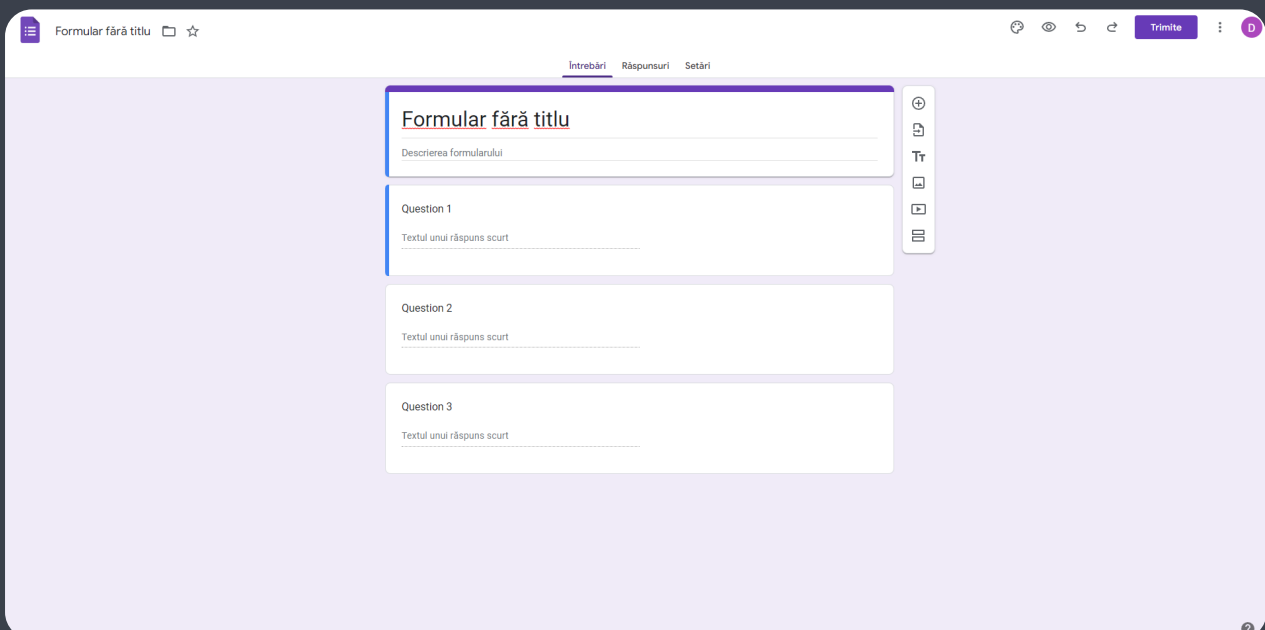

**1** Navigate to [docs.google.com/forms](https://docs.google.com/forms)

**2** Click on the “+” (plus) sign in the bottom right.

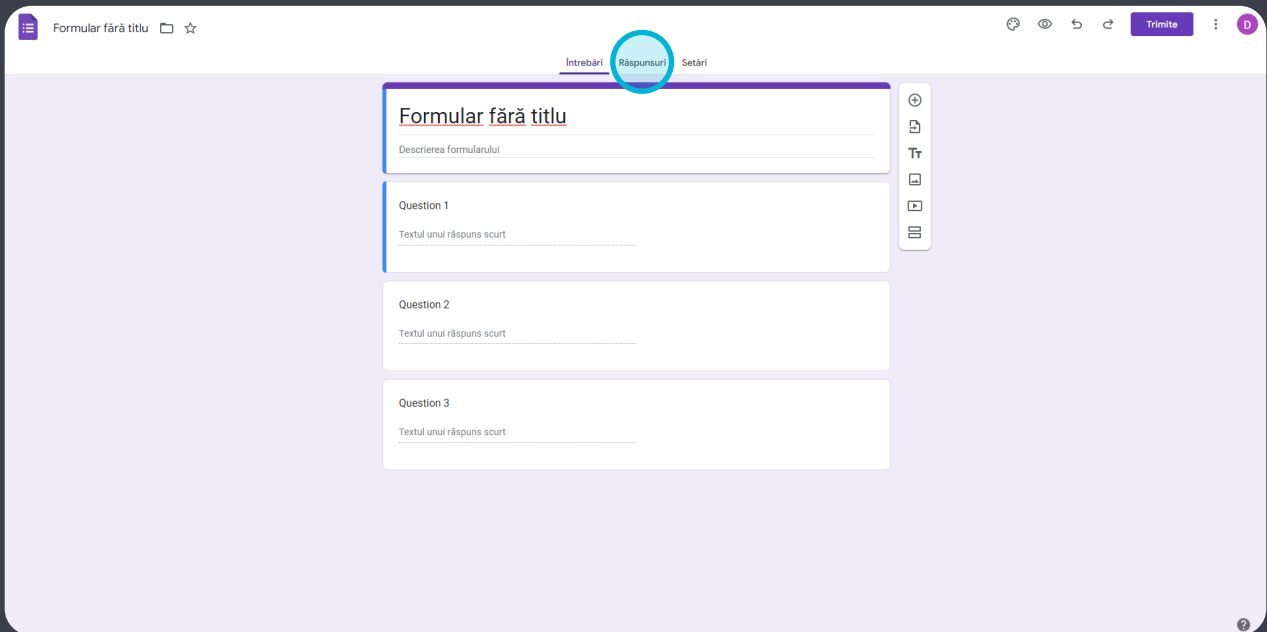

**3** Build the form with questions “short paragraph”

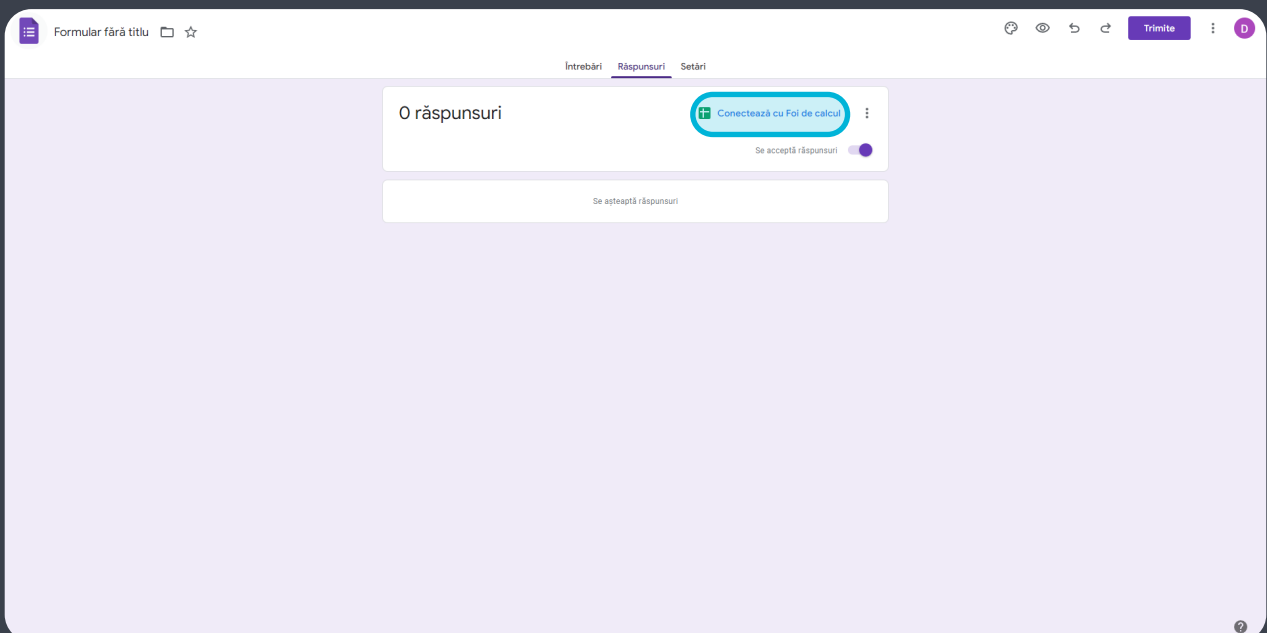

## 4 Organize your form.

## 5 Click on “Responses”.

The screenshot shows the Form overlay interface. The top navigation bar includes 'Intrebări', 'Răspunsuri' (highlighted with a red circle), and 'Setări'. The main content area displays the form structure with a title 'Formular fără titlu', a description 'Descrierea formularului', and three questions labeled 'Question 1', 'Question 2', and 'Question 3'. A sidebar on the right contains icons for adding, deleting, and duplicating questions.

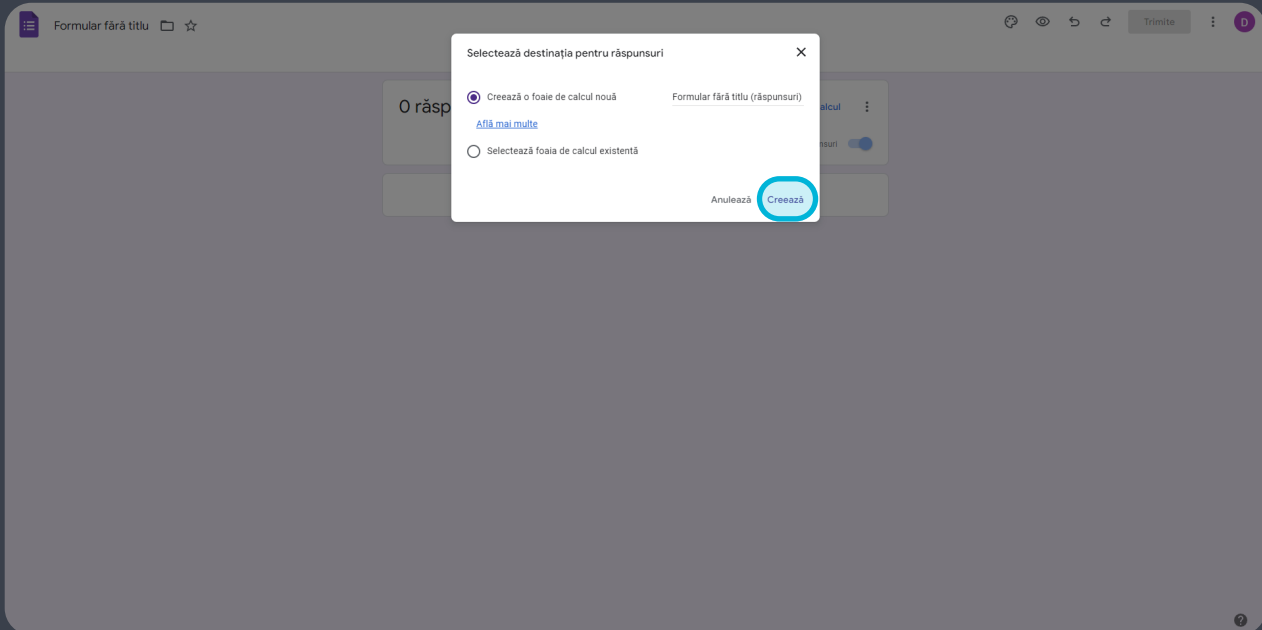

## 6 Click on “Connect with Spreadsheets”.

The screenshot shows the Form overlay interface with the 'Responses' tab selected. The main content area displays '0 răspunsuri' (0 responses) and a button labeled 'Conectează cu Foi de calcul' (Connect with Spreadsheets). Below this, there is a toggle switch for 'Se acceptă răspunsuri' (Responses are accepted) and a message 'Se așteaptă răspunsuri' (Waiting for responses).

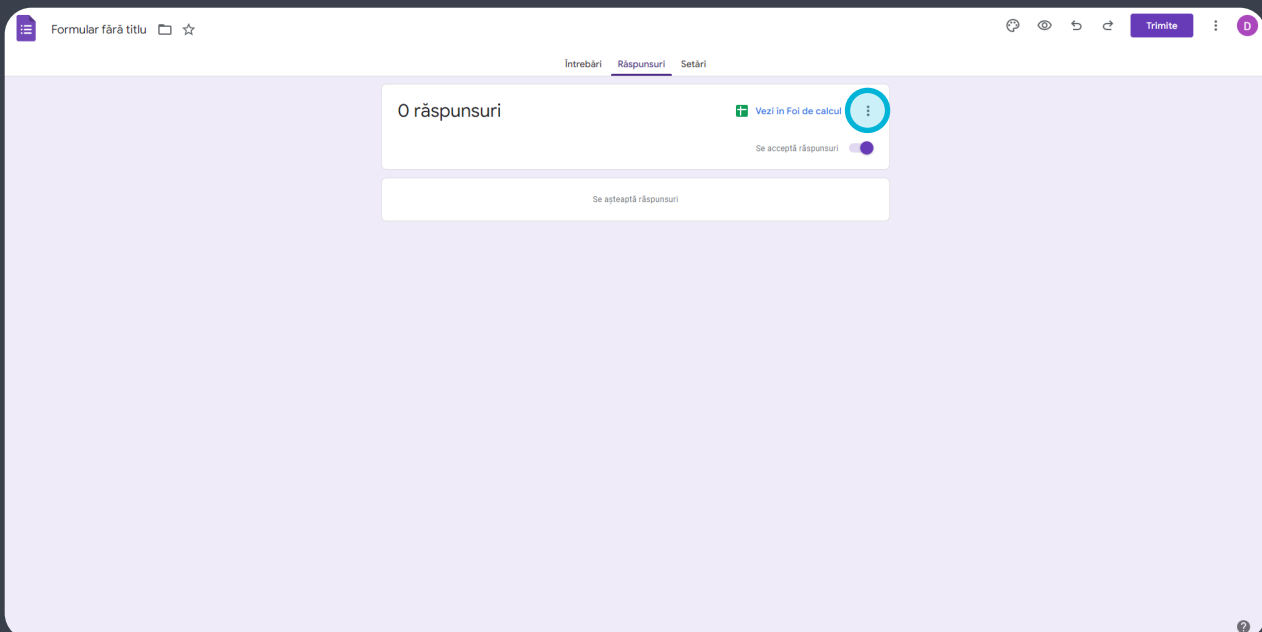

7

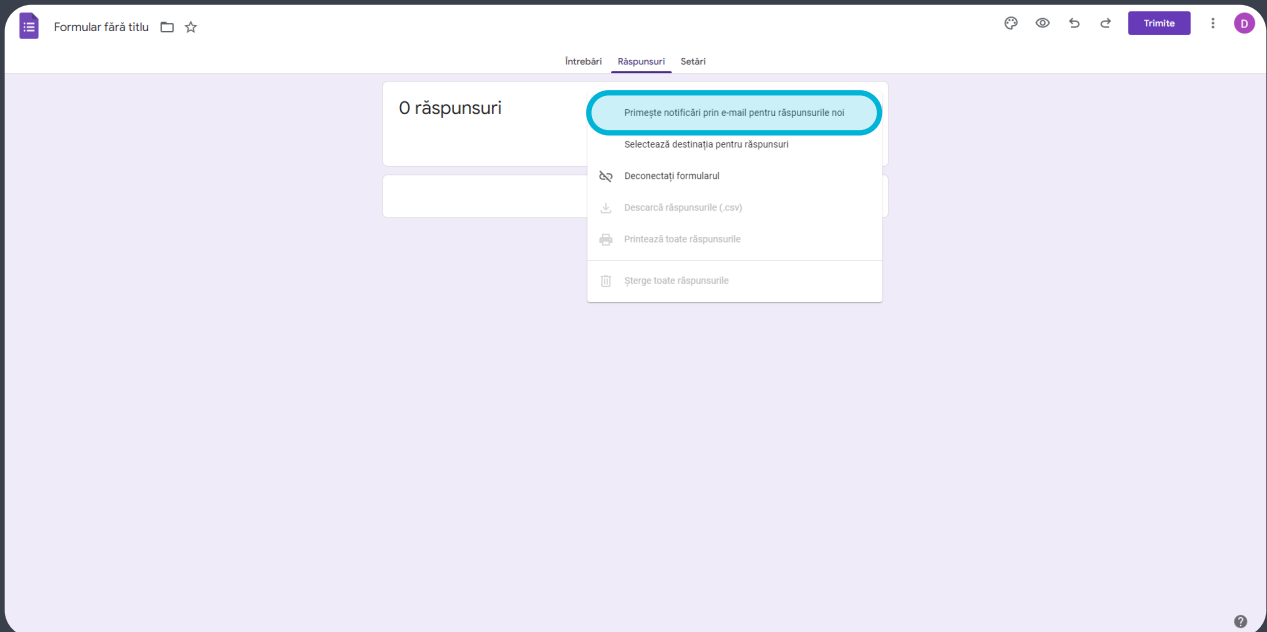

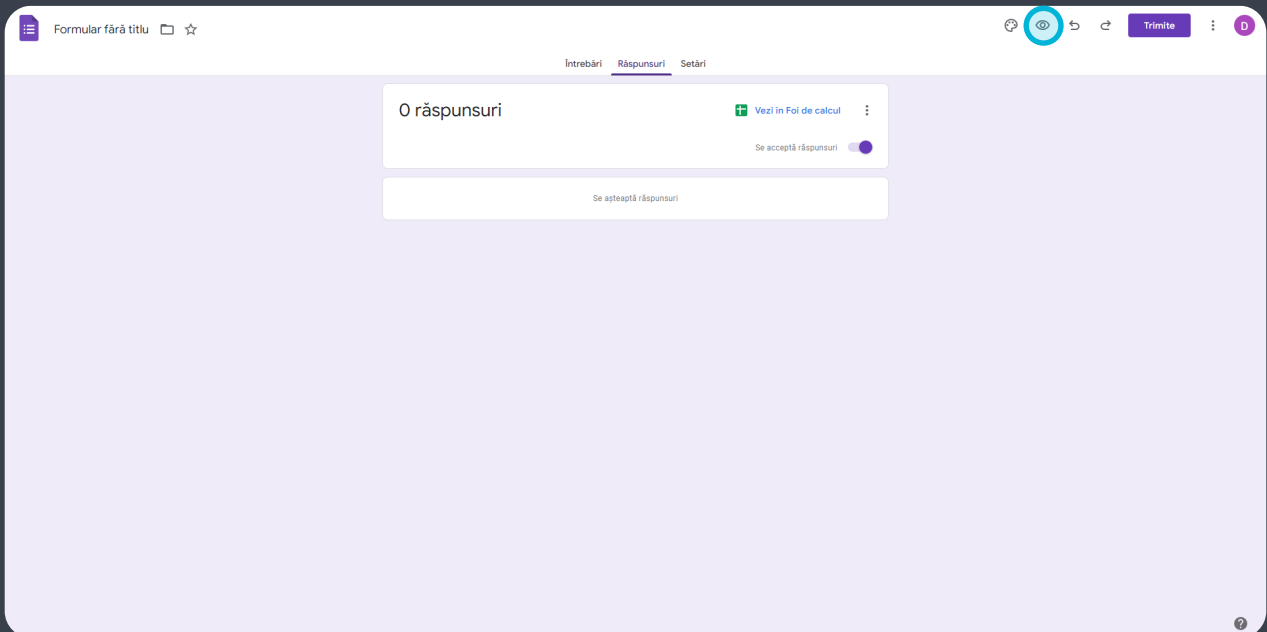

Make sure is “Create a new spreadsheet”. Then click “Create”

8

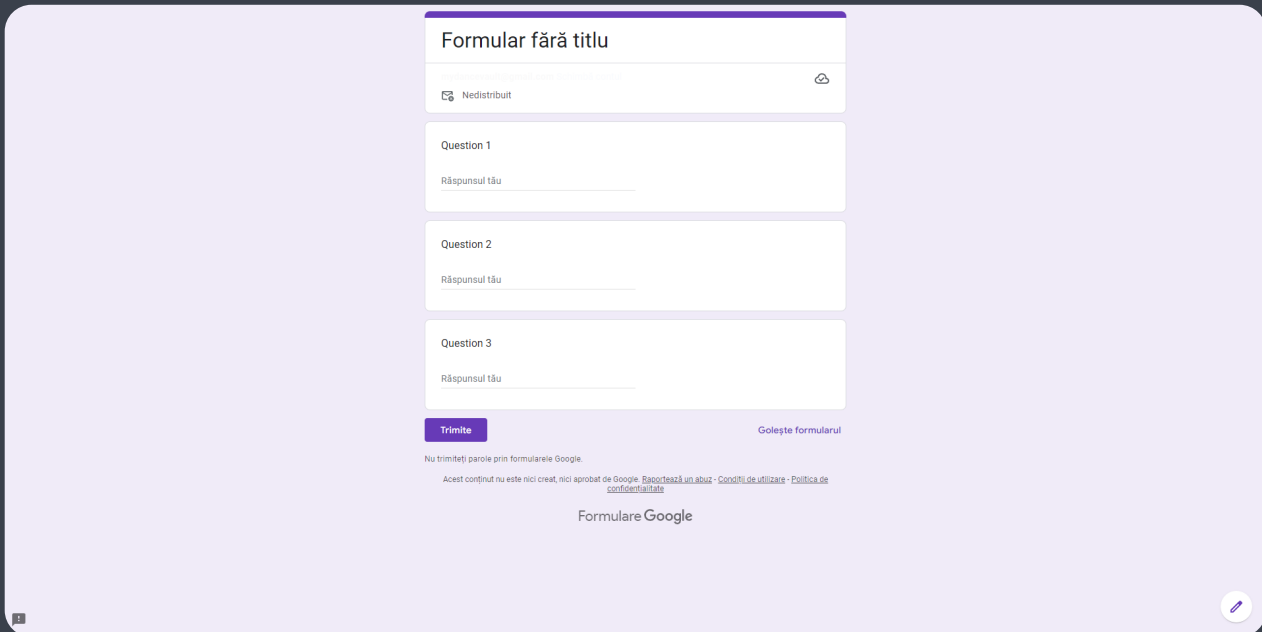

Click on “More” button.

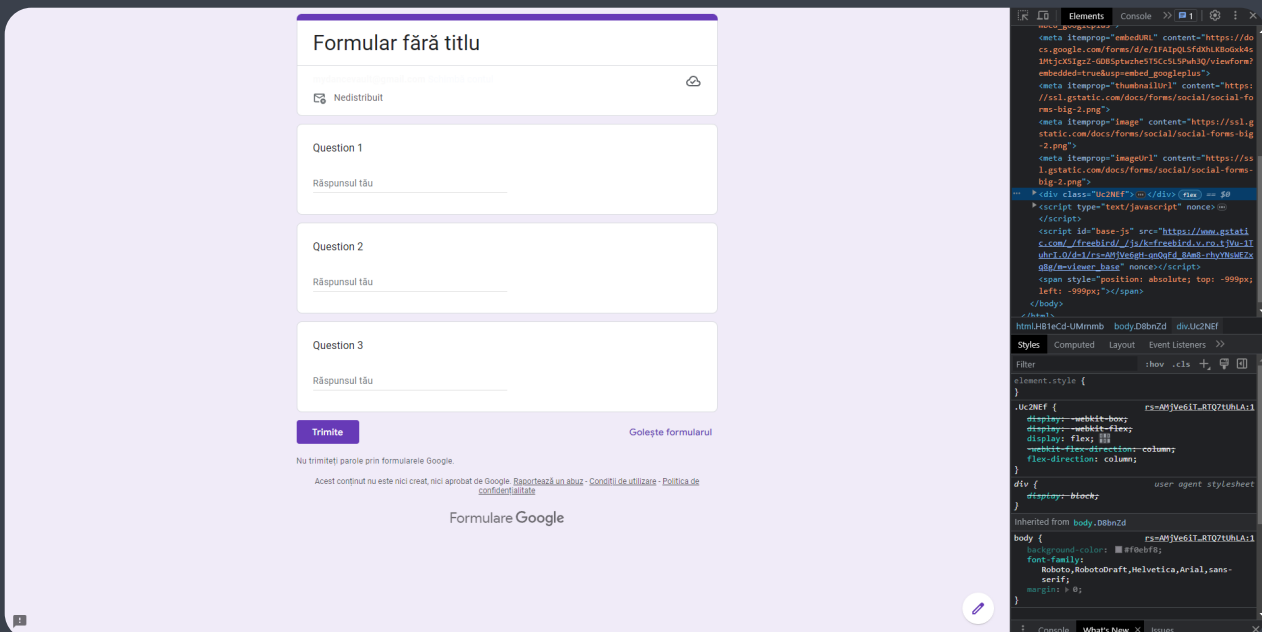

**9****Check “Get email notifications for new answers”.****10****Click on “Preview” button.**

**11**

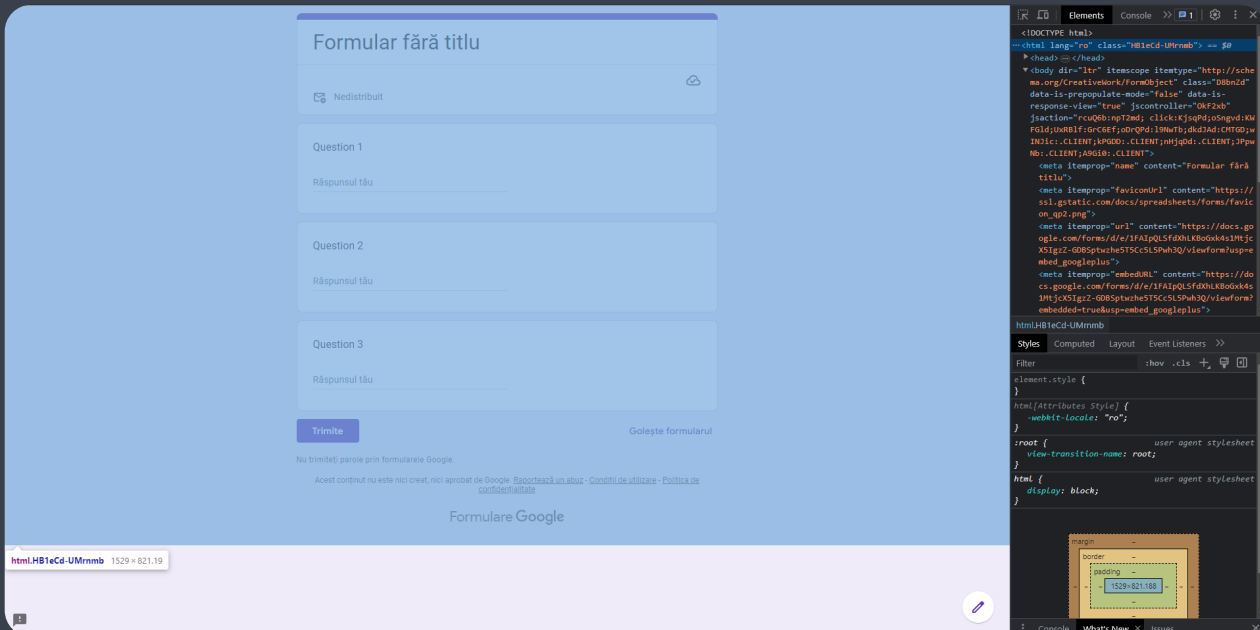

## Right click on the “Preview” page

**12**

## Open inspect element

## 13 Copy the document

The screenshot shows a Google Form titled "Formular fără titlu" (Form without title) with three questions and a "Trimite" (Submit) button. The form is displayed on a light blue background. To the right of the form, a code editor window is open, showing the HTML code for the form. The code includes a meta tag for the form's title and a script for the form's functionality. The code editor also shows the form's structure in a tree view, with the form's title and the form's content visible.

## 14 Post the code into the app google form section
